

A recent Ground Floor team meeting reviewed last year and made plans for the coming year.

Amongst successes from 2008 we have survived the switchover to the

The Year Ahead

Shibboleth authentication of databases. (Do let us know if there are any outstanding problems.)

Pamphlets have been reintegrated with the main book stock so that they are much simpler to find. (Other floors of the Library are now looking to emulate this!)

SciTech Update has been instituted as a monthly feature going to all staff

in the Science and Technology faculties.

And our provision for students needing the Accessibility Computers has improved.

Meanwhile, looking to the future we plan on weeding the following sections this summer: Earth Sciences (550-569) and Computing (004-006). We may also be able to look at General Science (500) and Maths (510) if there's time. Watch this space (and email)

for further information later in the year.

We also plan on reviewing some of our short runs of ceased journals and our leaflet provision—so if there's anything you'd particularly like to see, do let us know.

In short there's lots happening, so do stay in touch and let us know if there's anything particular we can help with.

Electronic ILLs

Inter-Library Loans requests for journal articles can be supplied electronically if that suits you more than a photocopied physical version from the British Library.

There are a couple of things to bear in mind, however:

- you'll be provided with a URL which **must** be viewed within two weeks, and
- it can **only** be viewed one time (but the article can be printed out)

(these are restrictions from the British Library not the University).

But if this form of delivery would be more useful to you, just mark on your form

(perhaps by your signature which will still be required), "please supply electronically" or words to effect. Some 95% of distance learners prefer this delivery method.

the search interface (see below).

You can browse journals or search for specific articles and of course print, save, bookmark as usual and there's even an option to export the references to, say, EndNote.

Here are a couple of examples of articles that seemed appropriate as we experience sub-zero temperatures:

Field Study of Concrete Maturity Methodology in Cold Weather. S. Bagheri-Zadeh et al, *Journal of Construction Engineering and Management*, November 2007, 133(11), pp827-835.

Subtropical cold surges: regional aspects and global distribution. René D. Garreaud. *International Journal of Climatology*, 21(10), August 2001, pp1181 - 1197.

Dawsonera e-books

An interesting feature of the Dawsonera e-book service is the chance to have a five minute preview of possible e-book purchases.

Login and use the Advanced search form to enter item/subject details. Click in box to "include not owned". The search will be carried out on their complete e-book category. You can then browse a title for five minutes..

Remember MyILibrary or Elibrary may also supply the e-book.

EJS e-journals [Ebsco Journals Service]

EBSCO is one of our main subscription suppliers. They have now developed a much more sophisticated database to provide access to the thousands of journals and articles they supply across a host of subject areas. Unlike the older version (Ebsco host, due to disappear soon) this service is fully shibboleth compliant for off campus use.

Users familiar with Business Source Premier, CINAHL or SPORTDiscus will recognise

The screenshot shows the EBSCOhost search interface. At the top, there are search fields for 'Search All Text' and 'Select a Field (optional)'. Below the search bar, there are dropdown menus for 'in' and 'Select a Field (optional)'. The search term 'cold weather' is entered in the first field. On the right side of the search bar, there are 'Search' and 'Clear' buttons. Below the search bar, there is a link to 'Sign In to My EBSCOhost'. At the bottom of the search bar, there are links for 'Basic Search', 'Advanced Search', 'Visual Search', 'Search History/Alerts', and 'Preferences'. The main area displays search results for 'Cold weather' with 1-30 of 32 results. The results list includes titles such as 'Assessment of the effects of environmental radiation on wind chill equivalent' and 'Results for: TX coldweather'. There are also options to 'Sort by Date' and 'Add (1-30)' to a list. A sidebar on the left shows 'Narrow Results by Publication' with titles like 'Journal of Environmental Engineering', 'Journal of Materials in Civil Engineering', and 'BMJ (British Medical Journal)'. A footer at the bottom of the page includes links for 'Help' and 'University of Portsmouth Library'.
