Searching ScienceDirect

ScienceDirect is a journal article database produced by the Dutch publisher Elsevier. ScienceDirect, which indexes journal articles covering all the sciences, allows you to find out what is 'out there' in the journal literature on a specific topic. Unlike many databases ScienceDirect is a full-text database, so, having found an article you should be able to display its full text without needing to look elsewhere for this. <u>Note that only journals from</u> <u>Elsevier, the world's major Science Technology and Medicine publisher, are indexed in</u> <u>ScienceDirect</u>.

Getting started

- 1. Go to the University Library website www.port.ac.uk/library
- 2. Click on Resources and then click on Databases
- 3. Click on the ScienceDirect link on the right under Top Databases

If you are accessing ScienceDirect when you're not on campus, you need to click on the <u>Other Institution login</u> link under the heading **Sign in via your institution**. Under **Search for your institution**, type in 'University of Portsmouth' and click the name when in appears in bold beneath. Use your university username and password to login where the UoP login box appears.

You should now be at the welcome screen of ScienceDirect, part of which is shown below.

ScienceDirect		Journals & Books Register Sign in > 🕐
	Search for peer-reviewed journals, articles, book chapters and open access content. Keywords Author name Journatbook title Volume Issue	Pages Q. Advanced search
	Discover more with ScienceDirect

The Advanced Search screen is where you can build up a search by including or, excluding specific terms. You can link search terms by AND, OR or AND NOT logic and you can choose your sources to search from eg; Research articles or Book chapters or both. Having entered your search terms in the search box(es) you execute the search by clicking on the **Search**.
