

Getting started with ebooks

eBooks are on-screen versions of books that are available any time from any computer with Internet access. Our largest collection is provided by Ebook Central which contains academic texts on a range of subjects. We also have access to collections of ebooks (many of which are on reading lists) from other suppliers such as Credo, EBSCO, JISC Historical Texts and Oxford Scholarship Online amongst others.

There are a number of ways to find out what's in the Library's ebooks, but the Discovery search is a good place to start. We recommend this because in many cases it will enable you to search the full text of the ebook rather than just information from the description of the ebook e.g. title, author, publisher etc.

You can identify e-books in your search results by the note 'eBook' below the title/image and the description 'Online Resources' in the location field.

2. **Research methods** : information, systems and contexts / Kristy Williamson, Graeme Johanson, editors. 🔖

Cambridge, Massachusetts : Chandos Publishing, 2018. Second edition. 1 online resource (645 pages) : Illustrations Language: English, Database: Library Catalogue

Subjects: Research – Methodology; Information science; Electronic books

| eBook | Location | Shelfmark | Status |
|-------|------------------|-----------|---------------------|
| | Online Resources | / | View Catalog Record |

You can narrow down to ebooks only by selecting 'eBooks' from the Source Types filter on the left of the search results screen.

Accessing ebooks

The process for accessing ebooks from each collection can appear slightly different depending on what you're accessing, where from, and on what device. With all collections, you'll need to log in using your university username and password. In order to use ebooks, you may also need to use software such as Adobe Reader or install a plugin via your browser.

Library staff are happy to help if you experience any difficulties.

Why use e-books?

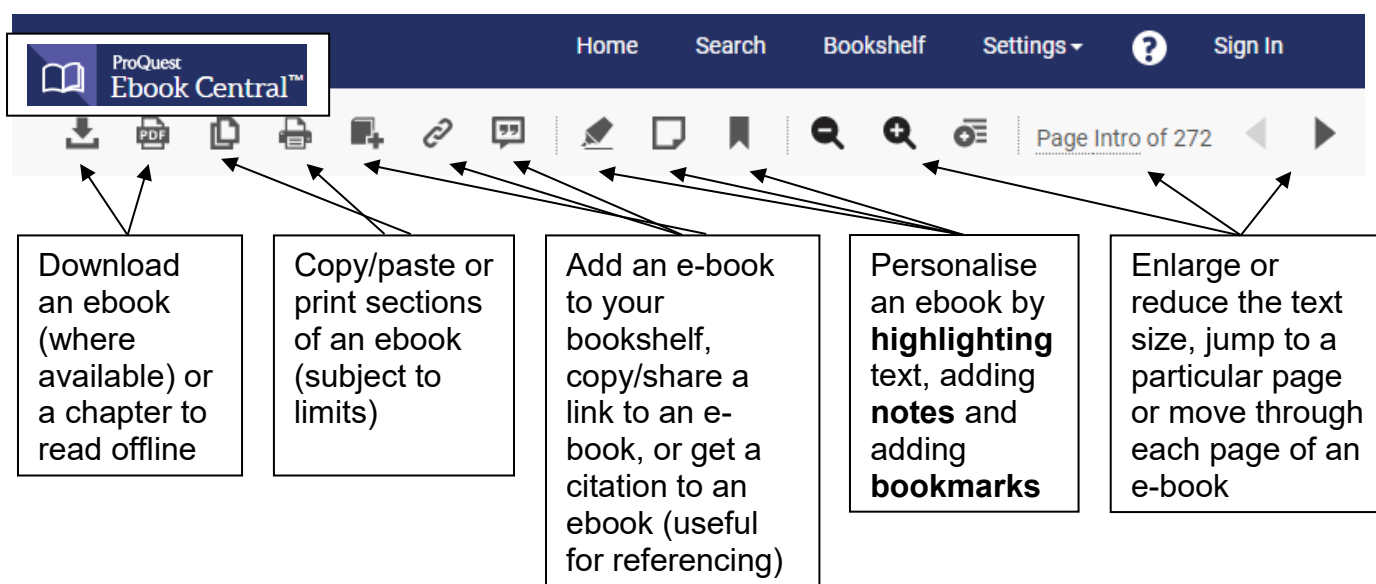

We target our purchase of individual ebooks to ensure that wherever possible copies of the most in-demand texts, and those on reading lists, are available electronically. This makes it easier for you to get access to material recommended by your lecturers, even when all our print copies are on loan or you can't get to the Library building.

We are also investing in patron-driven acquisition, whereby potentially useful titles are loaded into the Library catalogue and only paid for if they are used. You won't know if you are buying a new ebook or accessing one of our existing titles – what matters is that you have information delivered to your desktop when you need it.

Additional features

eBooks aren't just for reading online. Although extra features vary between suppliers, most will let you download or print sections you need (up to the legal copyright limit of 5% or one chapter, or a different limit agreed under the license with the publisher), let you highlight sections and even make notes on the text which you can refer to later.

For example, the features on Ebook Central (below) are typical.

Accessing individual ebook collections

If you want to access an individual ebook collection, select **Using Resources** at the top of the Library homepage, then **Books and eBooks** from the drop-down menu shown. Then click the **eBook Collections** link, and select the option you require from either the 'Major eBook Collections' or 'Additional eBook resources' categories.
